PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 703487PCT	FOR FURTHER A	CTION	See Form PCT/IPEA/416			
International application No. PCT/CA2005/000289	International filing of 28 February 2005	late (day/month/year) (28-02-2005)	Priority date (day/month/year) 04 March 2004 (04-03-2004)			
International Patent Classification (IPC) or national classification and IPC IPC(7): E05F 11/48, E05F 15/16						
Applicant INTIER AUTOMOTIVE CLOS	Applicant INTIER AUTOMOTIVE CLOSURES INC. ET AL					
This report is the international prelimin under Article 35 and transmitted to the	ary examination repo applicant according t	rt, established by this Interna o Article 36.	tional Preliminary Examining Authority			
2. This REPORT consists of a total of	4 sheets, include	ling this cover sheet.				
3. This report is also accompanied by ANNEXES, comprising:						
a. [X] (sent to the applicant and						
[X] sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
goes beyond the	[] sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.					
b. [] (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s))						
containing a sequence listing and/or tables related thereto, in electronic form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).						
4. This report contains indications relating	to the following item	s:				
[X] Box No. I Basis of the repor		•				
[] Box No. II Priority						
		ard to novelty, inventive step	and industrial applicability			
[] Box No. IV Lack of unity of in						
		*	entive step or industrial applicability;			
citations and expli	anations supporting s	ich statement

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/CA2005/000289

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial
	applicability; citations and explanations supporting such statement

1. Statement					
Novelty (N)	Claims	<u>1-12</u>		YES	
	Claims	NONE		NO	
Inventive step (IS)	Claims	<u>1-12</u>	•	YES	
	Claims	NONE		NO	
Industrial applicability (IA)	Claims	<u>1-12</u>	·	YES	
	Claims	<u>NONE</u>		NO	

2. Citations and explanations (Rule 70.7)

Reference is made to the following documents: D1: US6256929 (Serrano et al.) 10 July 2001

D1 discloses a window regulator having a rail member, a cable, and a motor. The motor drives the cable along the rail to move a window pane engaged on the cable. The rail has a mounting on which a motor casing which houses the motor can be adjusted to a selected position and then securely fixed to the mounting. The motor that operates the cable is also fixed to the casing. The selectability of the mounting position allows the drive motor to be moved for tensioning of the rail cable.

Novelty (N)

Claims 1-12 appear to comply with PCT Article 33(2) because the prior art does not teach a window regulator characterized by a rail having a guide located at one end and a drive means located at the opposite end whereby the drive means are pivotally mounted to the rail to allow the drive means to be moved away from the opposite guide to tension a drive cable.

Inventive Step (IS)

Claims 1-12 appear to meet the criteria set out in PCT Article 33(3). The claims are considered to involved an inventive step, having regard to the closest prior art D1at the relevant date. D1 teaches of a centrally-located motor housing which is pivotally mounted to a window regulator rail assembly to allow tensioning of the drive cable. It would not have been obvious for a person skilled in the art to relocate the pivotal-mounted drive means of D1 to one end of the rail as per current invention.

Industrial Applicability (IA)

The subject matter of claims 1-12 is considered to be industrial applicable and thus fulfills the requirement of PCT Article 33(4).

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY
